

I request that the FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protection.

Our daily bothersome/harrassing calls have been eliminated so we can be more productive at work, not be awakened before 7 AM, have peaceful meal times, and not have calls all evening long.

We would receive an average of 3-10 calls a day (truthfully), now receive only 1 per month.

My elderly mother now feels safe to answer her phone, knowing that she will not be harrassed by telemarketers. It is important for the elderly to not be frightened by phone calls.

Many telemarketers would not give up with a "no" and continue calling repeatedly in the same time frame. It doesn't take a rocket scientist to figure out why many people now have cell phones rather than a regular home phone.

Please listen to the public.
